

MULTITECH SOLUTIONS

BARCODE SPOKEN HERE.....

OUR MOTTO

A satisfied Customer is the best promoter of our business.....

- Warehousing and Inventory • Receiving and Putaway • Shipping and Distribution • Transportation • Work-in-Process • Point of Sale
- Sales Automation • Fleet Management • Asset Management • Document Tracking • Customer Service

Multitech Solutions is a leading System Integration service provider in the field of Automated Identification and Data Collection (AIDC) solution for over a decade now. We are committed to providing the most cost effective, scalable and customer driven solution in Bar coding, RFID, Mobile computing, Wireless data communication systems, Thermal Transfer Ribbons & having own state of art manufacturing unit of Barcode Labels, Computer labels, Holographic Strip labels and many specialty labels which we supplied to various sector like Manufacturing, Logistics, Retail, Aviation, Hospitality and Healthcare. Our solutions are supported by world-class equipments from **Motorola (Now Zebra), Metrologic, Intermec, Datamax (Now Honeywell) USA, TSC and Citizen**. We have Expertise in Consumable and having our own state of art manufacturing unit of especially **LABELS IN ROLL / SHEET FORM CAN BE PLAIN / PRINTED, ALL TYPES AND T.T.RIBBONS OF SONY, RICOH , DYNIC and POS Rolls** with best competitive prices.

OUR STRENGTHS

CUT COST NOT QUALITY

- **Customer Satisfaction** with our range we aim at winning the trust and confidence of our clients spread across the market.
- **Quality Assurance:** we never compromise with quality so we have a separate team, which makes sure that all products are stringently checked for quality.
- **Excellent Team Work:** We have a team the specialist of every field. Our team of technical support experts are available round the clock for servicing, repairing and maintaining for Hardware & our software team is always working to develop software. We provide best service in minimum time.
- **Long Time Relationship with Customer:** Some of the factors like, Excellent after sale service, qualified team, Fine Quality products, Industry leading prices, High end facilities, excellent quality control, these quality help us to have long term relationship with our customer.

RFID

Radio Frequency Identification (RFID) is a flexible technology that allows businesses to close the gap between acquiring data, converting it to meaningful information and automating all associated transactions. It can provide traceability and real time control to meet customer and regulatory requirements while actually improving efficiency and profitability. RFID can be read-only or read / write, does not require contact or line-of-sight to operate, can function under a variety of environmental conditions and provides a high level of data integrity. In addition, because the technology is difficult to counterfeit, RFID provides a high level of security.

RFID technology finds use in the following applications:

- Inventory/ Warehouse management
- Work-in-process
- Container/ Yard management
- Automatic vehicle identification
- Patient monitoring
- Document/ Jewellery tracking

The RFID solution typically includes the following :

- RFID Device (Transponder or Tag)*
- RFID Antenna
- RFID Transceiver (Reader)
- Business Process Study
- Interfacing and communication software

* We specialize in providing customized tag design and packaging for different application requirements.

Bar Coding

Bar coding solutions today are finding large scale acceptance as the best possible method of accurate and faster data entry into the user's system. Whether it's your production floor or the point of sale counter or the warehouse, the bar code solutions automate the data entry of transactions into your system. MTS , we interface our bar code hardware with virtually any existing application software including some of the complex ERP environments like SAP, Baan, Oracle, Peoplesoft, JD Edwards etc.

A typical bar code application includes:

- Bar code printers
- Bar code scanners
- Portable Data Terminals
- Labels and ribbons
- Interfacing and communication software
- Label design and printing software

Mobile Computing

Capture data on the move...is what mobile computing can do for your business. Whether it's your sales representative or your service engineer, mobile computing combined with the power of bar coding, helps your field staff in gathering information in the field itself enabling them to make decisions in real time. The sales team can utilize mobile computing to make effective sales and gather market data, while your service team can provide much more intelligent and prompt service to your customer.

The mobile computing solution consists of the following :

- Mobile computers
- Mobile printers
- Application software for mobile computers
